OBJECTIVE

Motivated Computer Science undergraduate with strong SQL and programming fundamentals, seeking an entry-level role to contribute to software development, data handling, and technology-driven business solutions while continuously learning and growing professionally.

PROFESSIONAL SUMMARY

- Computer Science undergraduate with strong fundamentals in SQL, programming, and web development.
- Skilled in writing SQL queries, performing data analysis, and working with databases.
- Strong foundation in Java programming, SQL, and software development fundamentals.
- Hands-on experience developing responsive web applications using HTML, CSS, and JavaScript.
- Completed projects involving real-time data processing and dashboard creation.
- Strong problem-solving and logical thinking abilities with a quick learning mindset.
- Good communication and teamwork skills developed through academic and project work.
- Seeking an entry-level Software/SQL Developer role to apply technical skills and grow professionally.

PROJECTS

Project: Smart Health Monitoring System

Domain: Healthcare & IoT (Wearable Technology)

Description:

This application is designed to collect, monitor, and analyze real-time health data from wearable devices. It tracks vital signs such as heart rate, temperature, and activity levels, helping users monitor their health status efficiently. The system processes sensor data through APIs and displays meaningful insights through an interactive dashboard.

Responsibilities:

- Involved in the analysis, design, and development of the application.
 - Integrated wearable device APIs to fetch real-time health metrics such as heart rate and temperature.
 - Developed a responsive dashboard using HTML, CSS, and JavaScript for visualizing live data.
 - Implemented dynamic charts to help users track trends and understand health fluctuations.
 - Built alerts and notifications based on threshold values to identify abnormal readings.
 - Worked with JSON data formats while handling sensor responses.
 - Ensured secure and efficient handling of API communication and data processing.
 - Conducted testing and optimization to improve dashboard performance and user experience.
- Result:* Improved real-time health monitoring efficiency and provided actionable insights through live dashboards.

TECHNICAL SKILLS

Programming: Java, Data Structures (Basic)

Web: HTML, CSS, JavaScript

Database (SQL): Data types, WHERE, ORDER BY, Operators, LIKE, DDL/DML, Functions (SUM/AVG/COUNT), GROUP BY, HAVING, Joins, UNION, Date functions

Tools: Git, Power BI, ServiceNow

CERTIFICATIONS

- ServiceNow Certified System Administrator – ServiceNow

- ServiceNow Certified Application Developer – ServiceNow
 - Web Development Training – Internshala
 - Power BI – Alison
 - Generative AI – Microsoft & LinkedIn
-

EDUCATION SUMMARY

Vignana Bharathi Institute of Technology, Hyderabad — B.Tech CSE (2022–2026), CGPA: 8.8

Sri Chaitanya Junior College — 98.1%

Chaitanya Bharathi High School — CGPA: 10

SOFT SKILLS

Problem Solving, Logical Thinking, Communication, Teamwork, Adaptability, Quick Learner

ACHIEVEMENTS

Maintained strong academics, participated in hackathons, recognized for teamwork and leadership.

Place: Hyderabad
